RETAIL CASE STUDY / LEVEL 2

Inventory, Promotions and Product Profitability

DD-RET-002 | Relationship Model | Reporting period 2023-01-01 to 2025-12-31

8	11	9	2
TABLES	RELATIONSHIPS	ACTIVE	INACTIVE DATE ROLES

Model diagram

Gold = fact or bridge table. Grey = dimension. Solid gold line = active relationship; dashed = inactive date role, activated inside a measure with USERELATIONSHIP. Filters flow from the one side to the many side.

Relationship register

FROM TABLE	FROM COLUMN	TO TABLE	TO COLUMN	ACTIVE
DimProduct	SupplierID	DimSupplier	SupplierID	Yes
FactInventorySnapshot	SnapshotDateKey	DimDate	DateKey	Yes
FactInventorySnapshot	StoreID	DimStore	StoreID	Yes
FactInventorySnapshot	ProductID	DimProduct	ProductID	Yes
FactSalesTransactions	TransactionDateKey	DimDate	DateKey	Yes
FactSalesTransactions	FulfillmentDateKey	DimDate	DateKey	No
FactSalesTransactions	ReturnDateKey	DimDate	DateKey	No
FactSalesTransactions	StoreID	DimStore	StoreID	Yes
FactSalesTransactions	ProductID	DimProduct	ProductID	Yes
FactSalesTransactions	PromotionID	DimPromotion	PromotionID	Yes
FactSalesTransactions	ChannelID	DimChannel	ChannelID	Yes

Date roles

- FactInventorySnapshot.SnapshotDateKey - active - Snapshot date
- FactSalesTransactions.TransactionDateKey - active - Transaction date
- FactSalesTransactions.FulfillmentDateKey - inactive - Fulfilment date
- FactSalesTransactions.ReturnDateKey - inactive - Return date

Working with the model

- Start every measure from FactSalesTransactions; aggregate secondary facts at their own grain before comparing.
- Single-direction filtering throughout. Do not add bidirectional filters to make a visual work.
- The register above is authoritative where the diagram and the data dictionary differ.
